

COM45For **IMMEDIATE** release

Invitation to the inauguration of the urban pollinator gardens

Châteauguay, September 22, 2021 - Ville de Châteauguay, in partnership with Miel Montréal, will inaugurate the *urban pollinator gardens* on Sunday, September 26, 2021.

Citizen participation project

The *pollinator gardens* project aims to rehabilitate a natural site by planting plants known for attracting insect pollinators. Over the next three years, over 1,500 plants will be planted in a 2,800 square metre protected area surrounded by **boulevard Rameau, rue Poupart, boulevard Kennedy and carré du Zodiaque**. It is also a privileged opportunity for residents to contribute to the transformation of their living environment by developing natural areas that encourage biodiversity.

Inauguration day*

During the inauguration on **September 26, 2021 at 2 p.m.**, in the presence of the Mayor and elected officials at Ville de Châteauguay and representatives of Miel Montréal, visitors will be able to access the gardens located close to **boulevard Rameau** (between numbers 220 and 224).

For this occasion, guided visits of the gardens will be organized. Miel Montréal will also run an awareness booth to answer residents' questions.

** If it's raining, the event will be postponed to Saturday, October 2. The announcement will be published on the city's [Facebook page](#) on Friday, September 24.*

The event will be held in compliance with current public health restrictions and social distancing rules.

To find out more about the *pollinator gardens*, please visit the official project page on Châteauguay's website at ville.chateauguay.qc.ca.
